

An Effective Method for Identifying Clusters of Robot Strengths

Jen-Chieh Teng

May 1, 2022

The R codes required to recreate the analysis and tables found in the article. Below, each file is listed individually with descriptions.

List of Data Files

- 2018_FRC_Data_*Div*.RData: Substitute 1, \dots , 12 for *Div* to load the data of Carver, Galileo, Hopper, Newton, Roebing, Turing, Archimedes, Carson, Curie, Daly, Darwin, Tesla division for the 2018 FRC championships.
- 2019_FRC_Data_*Div*.RData: Substitute 1, \dots , 12 for *Div* to load the data of Carver, Galileo, Hopper, Newton, Roebing, Turing, Archimedes, Carson, Curie, Daly, Darwin, Tesla division for the 2019 FRC championships.

List of R Files

- Identifying_Clusters_AUX.R: This file provides the R codes for estimation and prediction functions.
- Identifying_Clusters_MAIN.R: This file provides the R codes for the TCL and LCT method.
- FRC_data_analysis.R: This file provides the R codes for applications to the 2018 and 2019 FRC Houston and Detroit championships.
